Laurie Rubel received her BS in mathematics and computer science from Haverford College (1992), then was a K–12 mathematics teacher while earning her PhD from Columbia University (2002). She was on faculty at Brooklyn College, CUNY (2003–2018) before moving to the University of Haifa. Rubel’s research focuses on sociocultural contexts and equity in mathematics education. At Brooklyn College she was active in GLARE (GLBTQ Advocacy in Research and Education).

Rubel was awarded the Young Scholar Award from Knowles Science Teaching Foundation (2006), and an NSF CAREER award (2008–2014). She received a Fulbright Senior Scholar Award (2017) and was an invited speaker for the 2018 annual meetings of AMTE and PME.

This poster is part of the EvenQuads project, which combines innovative mathematical card games with learning about amazing women mathematicians. The project celebrates the 50th anniversary of the Association for Women in Mathematics.
